CLOUD CORPORATE

Cloud Corporate –
Best Practice Quick Start

Reduce implementation time by fast tracking the project with Best Practice Quick Start.

Over many years of working with leading employers and expert content providers, we have developed best practice system configurations and documentation best suited to your industry and size of organization.

Quick Start provides the immediate benefit of best practice labor relations without the necessity of a lengthy and often complex implementation process and its resultant costs.

Once users have operated the system for an initial period, and only if required, additional configuration changes can be implemented to further tailor the **Cloud Corporate** solution. This way there is certainty that configuration changes are limited to only those required, and the associated configuration costs are contained.

Quick Start benefits

- ✓ Immediately benefit from best practices
- ✓ Simplify the implementation process
- ✓ Save time and money
