Executive Summary

Labour & employee relations departments are looking to empower their organizations with technology that improves both process quality and efficiencies.

Investigation will reveal that the erNavigator functionality is acknowledged as a cost-effective leading enterprise grade solution that will meet all labour & employee relations needs and objectives.

- erNavigator enterprise is a secure unique cloud service specially developed for large clients with complex needs. It provides extensive functionality, powerful analytical capabilities, and crucial information to empower both line managers and labour & employee relations teams.
- Developed in conjunction with leading employment law specialists, making sure that all essential and relevant matters are considered so that fair decisions are taken, and legally defensible cases are formulated.
- Comprehensive in design but easy to use, erNavigator enterprise enables users to work on labour & employee relations cases in a collaborative, efficient and effective way across an entire organization and is aligned with international best practices.
- erNavigator enterprise is designed for organizations that need a powerful and configurable solution to align with policies, procedures and operational practices. It can be configured for local business practices and legislation, coupled with a language translation pack for the user interface
- erNavigator enterprise has been successfully implemented in both multilocation site companies and large multinational corporations, across a broad range of industries. With implementations in over 27 countries the platform meets the needs of international customer requirements.
- The platform can be integrated with existing HR enterprise systems, as well as selected collaboration platforms, via standard API's.
- It is a fully modular solution.

Introduction

A fair, equitable and harmonious working environment is a basic expectation of all employees, and there can be no doubt that this can provide a clear competitive advantage in the marketplace.

The interests of an organization are therefore best served if labour & employee relations are practiced in a way that fosters fairness, transparency, consistency, efficiency, and effectiveness, and which clearly demonstrates compliance with all legal and policy frameworks.

Problem statement

Many organizations acknowledge that a key labour & employee relations challenge is the continuing use of manual and fragmented processes. This is further complicated by the utilization of post-fact record-keeping systems.

Manual processes that are not integrated with one another limit an organization's ability to proactively manage the quality and standard of labour & employee relations. They cause process inefficiencies that impact on both cost and risk and make it very difficult to integrate labour & employee relations activities into the larger human capital ecosystem.

By nature, post-fact record-keeping systems are reactive and do little to enhance enterprise value, as they can only be used to produce post-fact outcome reports. The benefits of real-time data discovery and analytics are hence lost to the organization. These systems cannot be used in the real-time practice, management, and control of labour & employee relations processes. Further, inefficiencies resulting in increased risk and cost cannot be countered, so consistency, compliance and fairness cannot be guaranteed. This is particularly problematic in environments with increasing volumes of records, complexities, and a wide geographic spread.

Solution

We believe it is much simpler and more cost-effective to select a software solution from a trusted third party that lives and breathes labour & employee relations; one that can keep up with all the latest technologies, rapidly changing business practices and evolving legislation.

The erNavigator labour & employee relations platform is specifically designed to replace manual and fragmented processes and to enable user organizations to move beyond the limitations of post-fact record-keeping systems. It provides powerful tools to digitize all paper based and off system processes and to automate and standardize routine tasks so that companies can proactively manage and report on large volumes of labour & employee relations cases throughout the organization. It improves decision-making capabilities by automatically considering all localized legislative requirements and guides users through complex and high-risk procedures, by delivering relevant contextual information.

The logo for 'enterprise' is displayed in a lowercase, sans-serif font. The letters are primarily blue, with the 'e' and 'r' in the 'er' part being a lighter shade of blue. The 'p' and 'r' in 'prise' are also blue, but the 'r' has a small orange square above it. The 's' and 'e' at the end are blue.

erNavigator enhances enterprise value by creating process efficiencies that reduce the cost and risk associated with labour & employee relations management. The system also enables organizations to achieve full legal and policy compliance, to guarantee consistency and fairness, and to improve transparency and visibility with the availability of real-time data discovery and analytics.

Making the decision

The benefits of implementing a labour & employee relations platform will become self-evident. The most important question facing forward-thinking organizations is how to go about choosing the best supplier to suit their needs.

When faced with the system decision it is vital for organizations to consider these important aspects:

- ✔ Labour & employee relations modules
- ✔ System features
- ✔ System add on's
- ✔ Improving process quality & efficiency
- ✔ System benefits
- ✔ Supplier track record
- ✔ Change management services

We invite you to use the information sections on the following pages to help you to assess your organization's labour & employee relations management needs and to determine whether the erNavigator option is the right solution to meet your needs.

enterprise modules

erNavigator enterprise comprises multiple modules covering key labour & employee relations processes, which have been developed and enhanced over 15 years of working with leading employers and labour law specialists. The solution is flexible, providing a core database and licensing of only the modules needed. All modules freely share information, making consolidated reporting a powerful feature.

enterprise modules

Misconduct

The discipline module manages all formal, informal and appeal processes. Additional features also allow for the management of suspensions, workplace investigations and evidence and substantive compliance reviews.

enterprise automatically manages compliance with policies and legislation, and any deviations are recorded and escalated. Progressive discipline is managed, and consistency and fairness measures are monitored.

Incapacity including poor performance, ill-health, and disability

The incapacity module manages all poor performance-related issues such as performance improvement plans (PIP's), ill-health and disability processes including back to work routines.

Assists practitioners and line managers to manage reviews and follow-ups, as well as to allocate tasks to avoid unacceptable situations from continuing.

Operational Requirements

The operational requirements module automates and manages all retrenchment, redundancy and downsizing processes in accordance with applicable labour legislation, considering the role that unions may have in the process.

Dispute Resolution

The dispute resolution module manages all process from any dispute resolution forum, including voluntary processes such as conciliation or mediation and formal processes such as arbitration, tribunals, labour court and other litigation.

enterprise generates all legal case bundles and documentation thus eliminating the need to search for evidence and compile documentation manually.

Conflict Management, Grievance & Harassment

The conflict management module covers grievances, sexual harassment complaints, general complaints and tip offs.

The erNavigator automatically manages the case stages and line manager escalations.

Employees can raise grievances and complaints online, bypassing the need for the usual paper based manual processes.

The harassment portal is the first step to establish a secure and confidential pathway to lodge incidents.

enterprise features

Explore the erNavigator features that support best practice labour & employee relations.

enterprise features

Case Management

Replace labour & employee relations paper-based files with an electronic file containing all relevant evidence.

Process & Task Flow

Digitize all paper-based and off system processes and automate and standardize routine tasks. Direct users online through the organization's own labour & employee relations policies, methodologies and operational practices.

Compliance management

Automatically comply with the laws, rules, codes and standards applicable to the labour & employee relations environment. Promote process effectiveness and quality by continually governing and measuring consistency, fairness, and compliance.

Decision Support

Improve decision-making capabilities by automatically considering all localized legislative requirements.

Guides

Guide users through complex and high-risk procedures, by delivering relevant contextual information.

Content Management

Automatic generation of pre-populated labour & employee relations documents, forms, questionnaires and checklists.

Logos

Logos tailored in accordance with organizational requirements.

API's

Integrate labour & employee relations data with existing HR systems and collaboration platforms.

Reporting & Analytics

Extends control by centralizing data and providing on-demand powerful reporting and analytical capabilities, shifting the organization from a reactive to proactive outlook. Organize labour & employee relations data to report on trends vulnerabilities and successes throughout the organization.

Knowledge base
